FOOTWEAR CONVERSION CHART

EUR	US	GB	JPN	<i>Foot Length +1cm</i>
-----	----	----	-----	-------------------------

KIDS

25	8,5	8	15,5	16,2
26	9	9	16,0	16,8
27	10	9,5	17,0	17,4
28	11	10	17,5	18,1
29	12	11	18,5	18,3
30	12,5	11,5	19	19,0
31	13,5	12,5	19,5	19,6
32	1	13	20,5	20,3
33	2	1	21	21,0
34	3	2	21,5	21,6

WOMEN & MEN

EUR	US Ladies	US Man	GB	JPN	<i>Foot Length +1cm</i>
35	5	4	2,5	22,5	22,3
36	5,5	4,5	3	23	23,0
37	6	5	3,5	23,5	23,7
38	7	6	4,5	24,5	24,3
39	8	7	5,5	25	25,0
40	9	8	6,5	25,5	25,7
41	9,5	8,5	7	26,5	26,3
42	10,5	9,5	8	27	27,0
43	11	10	8,5	27,5	27,7
44	12	10,5	9	28,5	28,3
45	13	11,5	10	29	29,0
46	13,5	12	10,5	29,5	29,7

US and UK measurements are taken to their nearest size.

DE – Mist Du zwischen zwei Größen, wähle die nächstliegende Größe.

Wenn du dir unsicher bist, nimm besser eine Nummer größer.

EN – If you measure in-between sizes, chose the nearest size.

FINDE DIE RICHTIGE SCHUH- & STIEFELGRÖSSE

Ausführliche Erklärung

1. Um die richtige Schuhgröße zu finden, musst du zuerst deine Füße messen. Dafür stell dich bitte barfuß auf ein Blatt Papier, mit der Ferse gegen die Wand. Es ist wichtig, dass Ferse und Papierrand die Wand berühren und somit den gleichen Abschluss bilden.

2. Nun zeichne mit einem Stift deine Fußform nach (siehe Bild).

3. Nachdem du deine Füße aufgezeichnet hast, kannst du nun mit einem Lineal die Länge deiner Füße auf dem Papierblatt messen, von der längsten Zehe bis zur Ferse (Abschluss des Blatts). Um jetzt die richtige Innenlänge unserer Schuhe zu finden, musst du (mindestens) 10 Millimeter (1,0 Zentimeter) auf deine Fußlänge addieren.

4. Misst dein längerer Fuß zum Beispiel 22,8 Zentimeter (228 mm), musst du $22,8 + 1,0$ rechnen. Das ergibt ein Innenschuhmaß von 23,8 Zentimeter. Danach schaust du in unserer Tabelle „Conversion Chart“ und suchst unter „JPN“ nach der richtigen Schuhgröße, in diesem Fall wäre das die Größe EU 38 (24,0 cm).

Wichtig: Wenn du dir unsicher bist, welche Größen du nehmen sollst, wähle immer die nächstgrößere Größe.

Fazit

Es ist wichtig zu wissen, dass jeder Fuß anders ist. Die Länge der Füße ist zwar schnell bestimmt, doch je nach Fußstellung, Breite des Fußes, Spannhöhe oder Form deiner Zehen, kann es schwierig sein, die richtige Größe und Passform zu finden. Als Faustformel bei unseren Schuhen gilt deshalb, dass du 10 – 15 Millimeter (1,0 – 1,5 cm) auf deine Fußlänge addieren musst, um die richtige Schuhgröße zu finden. Letztlich musst du die Schuhe aber anprobieren, um sicherzustellen, dass du ein gutes und bequemes Tragegefühl hast.

1. Fuß auf ein Blatt Papier stellen. Ferse und Papier müssen mit der Wand abschließen.

2. Mit einem Stift die Fußform nachzeichnen.

3. Zeichnung der Fußform von der Ferse bis zur längsten Zehe nachzeichnen.

4. 10 Millimeter (1,0 cm) auf die Fußlänge addieren. Den Wert in unserer Größentabelle finden.

MASSNEHMEN VON STIEFELN & CHAPS

1. Bitte setz Dich gerade (barfuß) auf einen Stuhl,
Dein Knie in einer 90°- Neigung.
2. Bitte eine Reithose und Reitstrümpfe anziehen, die
Du normalerweise auch zum Reiten tragen würdest.
3. Lass Dich idealerweise von einer anderen
Person messen.

Nun wird gemessen

Weite messen (Weite):

Die Wade misst Du an der breitesten Stelle Deiner stärkeren Wade. Die Größe in der Größentabelle mindestens einen Zentimeter enger wählen, da sich Leder bei Gebrauch noch etwas dehnt.

Höhe messen (Höhe):

Miss die Länge (barfuß) von der Ferse bis in die Kniekehle. Dann ca. 2 cm auf die gemessene Länge addieren, da sich der Schaft bei Gebrauch einige Zentimeter setzen wird.

Beispiel

Du misst z.B. eine Wadenweite an der breitesten Stelle von 35 cm und eine Wadenhöhe von 46 cm.
Welche Größe wählst Du also:

$$\begin{array}{ll} \text{Weite} & 35 - 1 \text{ cm} = 34 \text{ cm} \\ \text{Höhe} & 46 + 2 \text{ cm} = 48 \text{ cm} \end{array}$$

Die richtige Größe in der Größentabelle ist also 34 / 48.

Tipp: Der Schaft muss eng anliegen und etwas länger von der Höhe sein. Das Leder gibt in der Weite mindestens 1 cm nach, in der Höhe wird der Schaft ebenfalls einige Zentimeter sinken. Wir empfehlen deshalb, die ersten Wochen einen Fersenkeil zu verwenden. Nicht alle Stiefel und Chaps werden gleich gemessen. Bitte beachte die Bemerkungen in den jeweiligen Größentabellen.

FIND THE RIGHT SHOE & BOOT SIZE

Detailed explanation

1. To find the right shoe size, you first need to measure your feet. To do so, please stand barefoot on a piece of white paper with your heel against the wall. It is important that the heel and edge of the paper touch the wall and thus start at the same point.
2. Draw your foot shape with a pencil (see picture).
3. After you have drawn both your feet, you can measure their length on the paper – from the longest toe to the heel (the heel marks the end of the sheet). In order to find the correct inner length of our shoes, you have to add (at least) 1 Centimeter to your foot length.
4. For example, if your longer foot measures 22.8 cm, you have to calculate $22.8 + 1.0$. This results in an inner shoe size of 23.8 cm. Then, refer to our „Conversion Chart“ and find the correct shoe size under „JPN“, in this case it would be size EU 38 (24.0 cm).

Important: If you are unsure which size to take, always choose the next larger size.

Conclusion

Every foot is different. The length of your feet can be determined quickly, but depending on the position of the foot, the width of the foot, the instep height or the shape of your toes, it can be difficult to find the right size and fit. The rule of thumb for our shoes is, that you have to add 10 – 15 millimeters (1.0 – 1.5 CM) to your foot length in order to find the right shoe size. In the end, you always have to try shoes on to make sure that you feel comfortable.

1. Stand barefoot on a piece of white paper with your heel and the paper against the wall.

2. Draw your foot shape with a pencil from the longest toe to the heel.

3. Draw both of your feet in order to use the longer foot for the following step 4.

4. Measure your drawing from the heel to the longest toe (the heel marks the end of the sheet). Add 10 millimeter (1 cm) to find the right shoe size on our size chart.

MEASUREMENT GUIDE FOR TALL BOOTS & CHAPS

1. Please sit in a chair with your knees at a 90 degree angle towards the floor.

2. Wear your usual riding breeches and socks (no shoes).

3. Have someone else measure your calves, if possible.

Measurement

How to measure your calf Width:

The calf needs to be measured at the widest part.

How to measure your calf Height:

The height must be measured barefoot from the bottom of the heel up to the back of the knee (sitting on a chair).

Example

You measure 35 cm in width and 46 cm in height.

Which size do you have to pick?

$$\text{Width} \quad 35 - 1 \text{ cm} = 34 \text{ cm}$$

$$\text{Height} \quad 46 + 2 \text{ cm} = 48 \text{ cm}$$

The correct size to pick is 34 / 48.

Tip: As tall boots and chaps tend to compress a few centimeters when in use, you should add 2 cm (as explained above). The shaft must fit tight. The leather will stretch at least 1 cm in width when use. Not all tall boots and chaps measure the same. Please check the remarks in the size chart per style.
